FOIL STAMPING	
Please call for pricing on all jobs that require foil stamping.	
All pricing for foil stamping is computerized based of size and type of foil that is required for the job. If you need foil color samples, please call.	

COPPER FOIL OR EMBOSS DIES	
Please call for pricing	
Prices listed above do not include dies. Camera ready art or a negative are required for making dies. Laser art is fine to use as long as it is at least 600 dpi.	
Art can be sent to us via email at the address below: nick@southwestletterpress.com	

PLEASE NOTE:

Foil Stamping and Embossing jobs do not fall under our normal turn around service. These jobs require more make ready time and as a result we are not able to always meet that schedule. Normally we require at least 2 to 3 working days. If a job is needed sooner, please call to see if we can meet your deadline.

Also note that it takes from 24 to 48 hours to have the copper foil and embossing dies made. Please allow this time when scheduling jobs with us and your customer.

MAKE READY

All Prices for foil and embossing include standard make ready. Type or intricate designs will require additional charges. When quoting, please provide sample or call if not sure if your design falls in this category.
